

Integrated Capital Cards

The Integrated Capital Card Deck is designed to help fund managers, funders and impact investors learn how to deploy integrated capital to close the racial wealth divide. The bilingual (English/Spanish) deck is made up of 121 cards in 8 suits that help match types of capital and transaction structures with startups, small businesses and nonprofits that are contributing to building regenerative and equitable economies. The deck includes Impact Criteria and Impact Covenants so that all transactions fully integrate both financial and impact expectations.

INTEGRATED CAPITAL CARDS: HOW TO PLAY

Role Play

Each player randomly selects a card from within a suit, such as “Local Stakeholders” or “Transaction Structure.” Game host offers a case study of an enterprise seeking investment. Players work together in their roles to come up with possible transaction structures and other solutions to the enterprise’s needs.

Build Your Own Hand

Each player selects as many cards as they wish to in order to tell a story from their own experience about a transaction they’ve been involved with in the past or want to create in the future. Once the cards are selected, they should be set aside as a hand. Players take turns sharing their stories.

Play the Hand You’ve Been Dealt

Each player selects one card from each suit (excluding “Financial Management & Reports”). The objective is to come up with a possible transaction based on the cards in their hand. Players can trade in up to three cards to construct a better hand. Players take turns sharing their stories.

These games can be played in person or in virtual breakout rooms, followed by learning debrief and discussion. The effect of playing is to deepen participants' understanding of creative financial tools for solving wealth inequality, as well as to broaden their view of how multiple stakeholders can solve problems together. Want to play a game?

The Boston Impact Initiative team is available to host a gaming session for your group. Each round of play will be broken down into teams of 3-6 players. Games can be designed for all experience levels.

HOST A GAME SESSION FOR YOUR GROUP
